

RANSOMWARE...

The Worst Day in
Your Organization is
Only One Click Away.

Are You Prepared?

Every

11 seconds

a ransomware attack happens

– PEN TEST

6000

victims every day

– HIGH COURT

\$20 billion

the estimated cost of ransomware attacks

– PEN TEST

LRS Security team can prepare your organization for a ransomware attack with the following Incident Prevention steps:

Incident Prevention:

- Foundational Security Analysis
- Incident Response Planning
- Network Segmentation
- Maturity Assessments
- Virtual Tape Library (VTL)
- Tabletop Exercise
- Cyber Range
- Security Awareness Training
- Email Security Software
- Backup Data Software
- Cloud Data Repositories

Organizations that implement Incident Prevention
have to do just these three things
to recover from a ransomware attack:

- 1** IR Remediation & Threat Response
- 2** Ransomware Removal
- 3** Data Recovery

Compare that to paying millions in ransom to recover your organization's data.
Remember, 92% of companies who don't pay the ransom, don't get their data back!

– FORBES

Prepare for ransomware. Call LRS Security Solutions today.
